KY Youth Services Satisfaction Caregiver Survey Report 2015 Statewide

In 2015 the Kentucky Cabinet for Health and Family Services (CHFS), Department for Behavioral Health, Development and Intellectual Disabilities (BHDID) conducted this survey to evaluate satisfaction of services delivered at Kentucky's Community Mental Health Centers (CMHCs).

Introduction

This document was created as a result of collaboration between two key entities:

- The Kentucky Department for Behavioral Health, Developmental and Intellectual Disabilities (DBHDID) and
- The Community Mental Health Centers (CMHCs)

Purpose

The purpose of this document is to evaluate the satisfaction of services delivered by the Community Mental Health Centers (CMHCs) from the consumer's perspective. The source of information reported in this document is aggregated results of a survey.

Why This Survey?

The Youth Services Survey for Families (YSS-F) was developed and validated at a national level in part to promulgate data standards that allow for valid results that better inform policy and decisions. The YSS-F is designed as the primary tool to evaluate and include the youth client caregivers' perspectives of public mental health services they have received.

Appropriate Use of These Survey Results

The results of this survey are intended to express the aggregated data of respondents' perception of care. This booklet represents the perceptions of a sample of CMHC clients who are actively receiving outpatient services during the time of the survey implementation. The results are not intended to be interpreted as the opinion of all CMHC clients of services received.

This output report includes results about the survey's seven core domains:

Domain	Primary Concerns Related to the Domain			
General Satisfaction	Services were, overall, satisfactory and preferable to other choices			
Access to Services	Staff availability, the range of service options, and how quickly and conveniently services were received			
Cultural Sensitivity	Cultural and linguistic access and whether services promoted recovery and continuity of care			
Participation in Treatment Planning	Clients' participation in planning services. For example, whether the patient, not staff, decided treatment goals			
Outcomes	Services provided patients with positive changes in areas for which treatment was sought and minimal negative outcomes.			
Social Connectedness	Services contributed to improving natural supports which come from family or friends			
Functioning	There was a positive effect on independent community living and decreasing distress caused by symptoms			

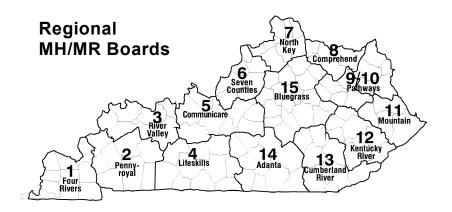

State Mental Health Authority

The Kentucky Department for Behavioral Health, Developmental and Intellectual Disabilities (DBHDID) is identified by Kentucky Revised Statute (KRS) 194.030 as the primary state agency for developing and administering programs for the prevention, detection, and treatment of mental health, developmental, intellectual disabilities, and substance use disorders.

DBHDID Website: http://dbhdid.ky.gov/

Regional Community Programs

Kentucky is divided into fourteen geographic regions for the purposes of planning and providing publicly funded community mental health services. For each region a Regional Mental Health and Mental Retardation Board has been established pursuant to KRS 210.370-210.480 as the planning authority for community mental health programs in the region.

Methodology

The survey was implemented at outpatient clinics operated by the CMHCs. Each spring for a two week period, staff made the survey available to people who arrived for outpatient appointments at selected clinics. Completing the survey was voluntary and had no implications on appointments or services provided.

Survey Penetration Rate

Survey Penetration

Table 1. Statewide Survey Penetration Rate in State Fiscal Year 2015 (July 1, 2014 - June 30, 2015)			
Number of Youth (Age < 18) Served	59,254		
Number of Surveys Returned	3,345		
Survey Penetration Rate	6%		

During state fiscal year 2015, 59,254 Mental Health (MH) youth clients visited Statewide. Three thousand three hundred forty-five caregivers of youth clients participated in the survey in Statewide, resulting in a 6% penetration rate. (Table 1)

Youth Clients' Demographic Characteristics

The demographic profile of MH youth respondents in Statewide in 2015 is presented below. In this report, youth respondents' demographic characteristics are presented on gender and race.

Gender

Table 2.		
Gender of Youth Respondents		
Male	58%	
Female	42%	
Total	3,243	

As Table 2 indicates, male respondents outnumber female respondents.

Race

Table 3. Race of Youth Respondents		
American Indian / Alaska Native	1%	
Asian	0%	
Black (African-American)	8%	
Hispanic	4%	
Native Hawaiian / Other Pacific Islander	0%	
White (Caucasian)	87%	
Other	3%	
Total	3,108	

The majority of youth respondents are White (Caucasian) (87%) while 4% of respondents report being of Hispanic descent.

Youth Clients' Social/Medical Backgrounds

Child/Youth caregivers who responded to the survey were also asked about living arrangements, school attendance, medical history, and number of months the child/youth received services.

Living Arrangement

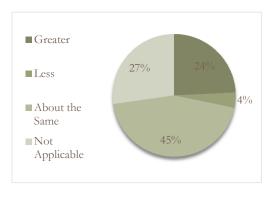

Table 4. Child Is Living with Caregiver		
Yes	98%	
No	2%	
Total	3,217	

About 98% of respondents indicate that their children are living with them.

Further questions reveal that in the last 6 months, about 77% of youth clients have lived with one or both parents and 13% of children have lived with another family member. (Data not shown)

School Attendance

Figure 1. The Number of Days Child Was in School Since Beginning Services

services (data not shown).

About 24% of respondents indicated that the number of days their children were in school has increased since they started receiving services (Figure 1) while 14% reported that their children were expelled or suspended after beginning

Medical History

Figure 2. Medical Doctors (or Nurses) Visits During Last Year

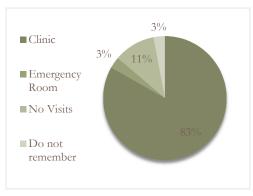

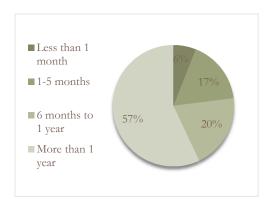

Figure 2 indicates that 83% of youth clients have visited medical doctors (or nurses) for a health checkup or because he/she was sick in the last year.

Also, 58% of respondents reported that their children are receiving medication for

emotional/behavioral problems. Among them, 87% of respondents report that the doctor or nurse shared information about side effects. (Data not shown)

Number of Months the Child/Youth Received Services

Figure 3. How Long Child Received Services from the CMHCs

Fifty-seven percent of respondents report that their children received services from the CMHC for more than 1 year. (Figure 3)

GENERAL SATISFACTION

Overview

Primary Concerns

- Provide Satisfaction
- Service Preferences and Satisfaction

Domain Score (1 to 5)
General Satisfaction	4.38
Access to Services	4.43
Cultural Sensitivity	4.53
Participation in Treatment Planning	4.38
Outcomes	3.73
Social Connectedness	4.32
Functioning	3.73

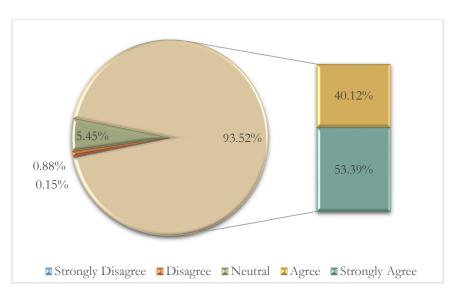

By national standards a domain score of 3.5 or greater indicates that responders, on average, positively perceived the services.

GENERAL SATISFACTION

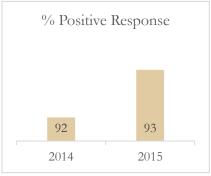

Overall, I Am Satisfied with the Services My Child Received

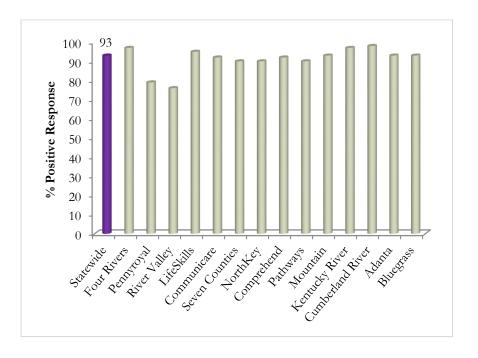

Statewide Totals

About 93% of respondents positively indicated that they were satisfied with the services their child received from the CMHC in 2015.

This is a 1% increase from 2014.

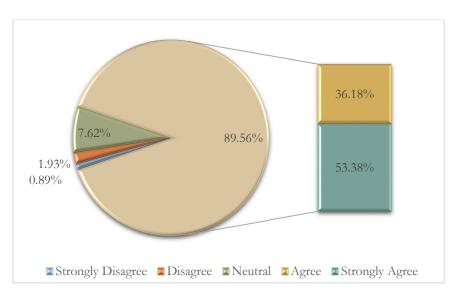

GENERAL SATISFACTION

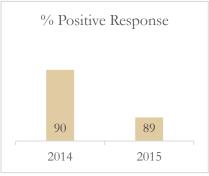

The People Helping My Child Stuck with Us No Matter What

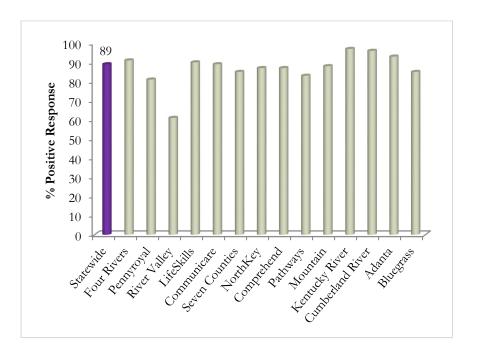

Statewide Totals

About 89% of respondents positively indicated that the people helping their child stuck with them no matter what in 2015.

This is a 1% decrease from 2014.

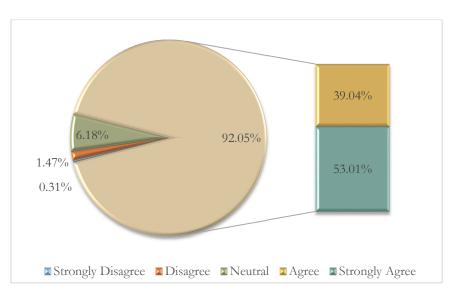

GENERAL SATISFACTION

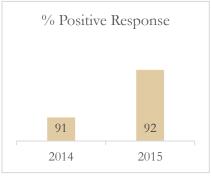

I Felt My Child Had Someone to Talk to When He/She Was Troubled

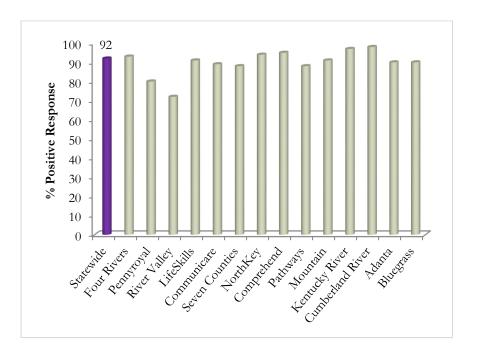

Statewide Totals

About 92% of respondents positively indicated that they felt their child had someone to talk to when he/she was troubled in 2015.

This is a 1% increase from 2014.

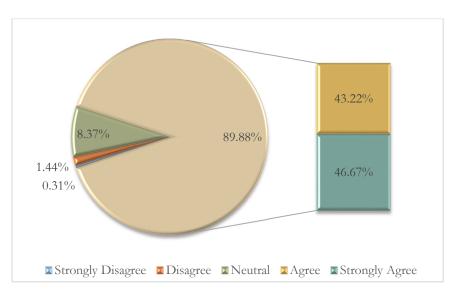

GENERAL SATISFACTION

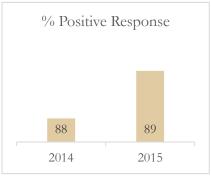

My Family Got the Help We Wanted for My Child

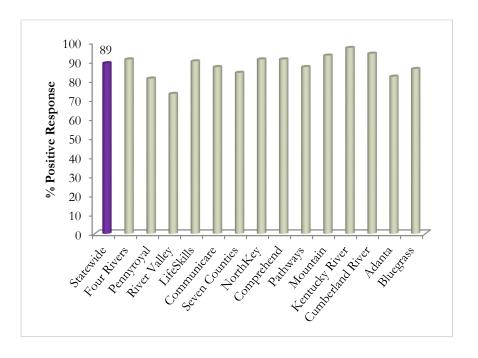

Statewide Totals

About 89% of respondents positively indicated that their family got the help they wanted for their child in 2015.

This is a 1% increase from 2014.

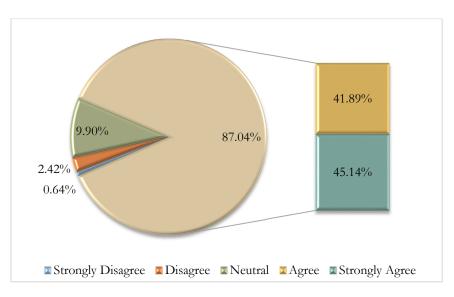

GENERAL SATISFACTION

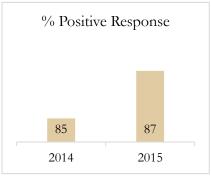

My Family Got As Much Help As We Needed for My Child

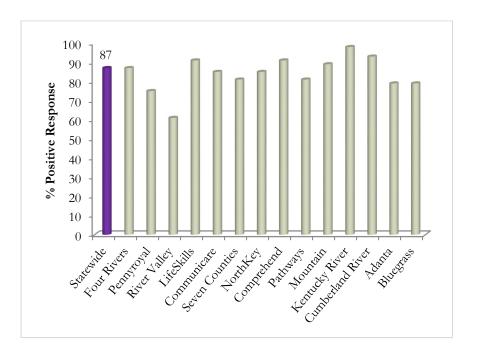

Statewide Totals

About 87% of respondents positively indicated that their family got as much help as they needed for their child in 2015.

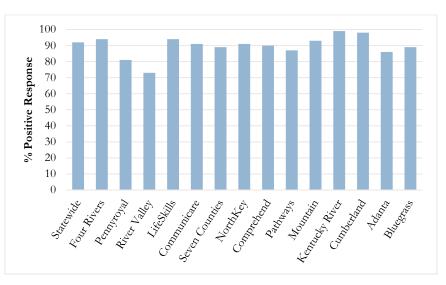

This is a 2% increase from 2014.

ACCESS TO SERVICES

Overview

Primary Concerns

- Quick and Convenient Entry into Services
- A Full Range of Service Options
- Staff Availability

Domain Score (1	to 5)
General Satisfaction	4.38
Access to Services	4.43
Cultural Sensitivity	4.53
Participation in Treatment Planning	4.38
Outcomes	3.73
Social Connectedness	4.32
Functioning	3.73

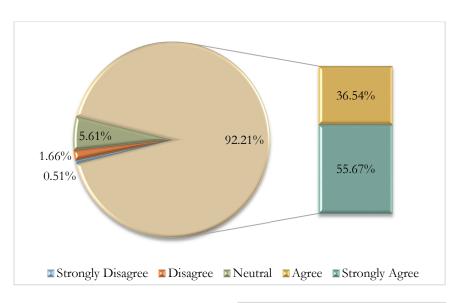

By national standards a domain score of 3.5 or greater indicates that responders, on average, positively perceived the services.

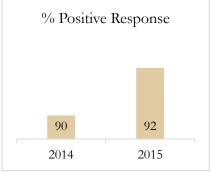

ACCESS TO SERVICES

The Location of Services Was Convenient for Us

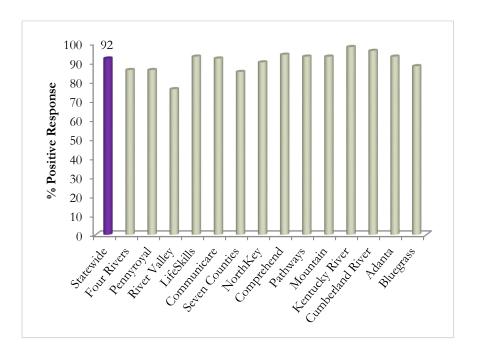

Statewide Totals

About 92% of respondents positively indicated that the location of services was convenient (parking, public transportation, distance, etc.) in 2015.

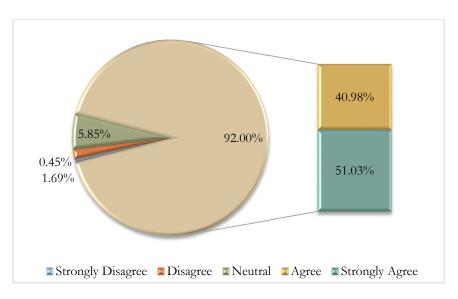

This is a 2% increase from 2014.

ACCESS TO SERVICES

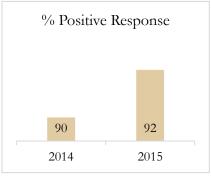

Services Were Available at Times That Were Convenient for Us

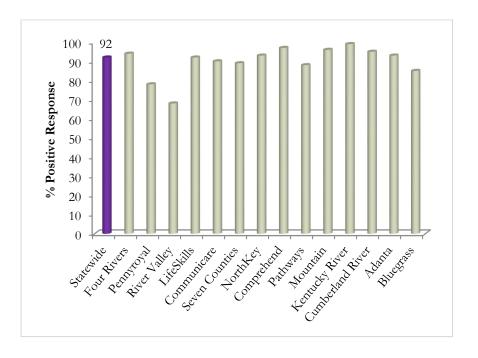

Statewide Totals

About 92% of respondents positively indicated that services were available at times that were convenient for them in 2015.

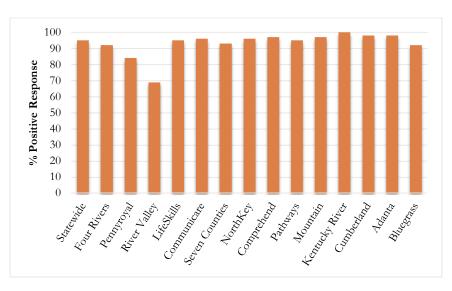

This is a 2% increase from 2014.
